Comments:

Plane Creek Mill processed just under 54,000 tonnes of cane for the week, bringing the season total to more than 1M tonnes.

Rainfall over the weekend was welcome due to the dry conditions but did result in some cane supply stops.

Scheduled chemical cleaning and planned maintenance was brought forward to take advantage of this wet weather stoppage.

Average weekly CCS came in at 15.99 units – a decrease of 0.58 of a unit on the previous week.

Bin weights dipped slightly on the previous week, to average 3.98 tonnes for the week.

The highest CCS honour for the week was a rake of Q208 plant cane from the Yukon productivity area, with a CCS of 18.80 units.

As we work through the final weeks of the season, please remember to use your train brain. Stay alert, do not linger near any part of the rail network and only cross the line at designated crossings.
